## About IRENA

The International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future, and serves as the principal platform for international co-operation, a centre of excellence, and a repository of policy, technology, resource and financial knowledge on renewable energy. IRENA promotes the widespread adoption and sustainable use of all forms of renewable energy, including bioenergy, geothermal, hydropower, ocean, solar and wind energy, in the pursuit of sustainable development, energy access, energy security and low-carbon economic growth and prosperity.

## Acknowledgements

This report was prepared by Iman Abdulkadir Ahmed, Dennis Akande, Nazik Elhassan, Akshay Jamdade and Julian Prime from the IRENA Statistics Team. For further information or to provide feedback, please contact the IRENA Statistics Team ([statistics@irena.org](mailto:statistics@irena.org)).

We are thankful for the valuable contributions from country statistical focal points, as well as from Jihye Gwon (IRENA, United Arab Emirates), Alan Bigelow (Solar Cookers International, USA), and Sara Rosen (Solar Cookers International, USA).

Publications and editorial support were provided by Francis Field and Stephanie Clarke. Communications and digitalisation support were provided by Nicole Bockstaller, Nanda Febriani Moenandar, and Daria Gazzola.

The IRENA Statistics Team also gratefully acknowledges the contribution to this dataset from the “Global Off-Grid Solar Market Report”, the most comprehensive primary data collection for the off-grid solar industry by GOGLA in partnership with IFC Lighting Global and the Efficiency for Access Coalition. GOGLA is the global association for the off-grid solar energy industry. Established in 2012, GOGLA now represents over 170 members as a neutral, independent, not-for-profit industry association. Its mission is to help its members build sustainable markets, delivering quality, affordable products, and services to as many households, businesses and communities as possible across the developing world. The products and solutions that GOGLA members sell transform lives. They improve health and education, create jobs and income opportunities, and help consumers save money. To find out more, go to [www.gogla.org](http://www.gogla.org).

The IRENA Statistics Team thankfully acknowledges SNV for the contribution of historical data on biodigester. SNV is a mission-driven global development partner working in more than 20 countries across Africa and Asia. Building on 60 years of experience and together with our team of over 1,600 people, we strengthen capacities and catalyse partnerships that transform the agri-food, energy, and water systems, which enable sustainable and more equitable lives for all. Grounded in the 2030 Agenda for Sustainable Development, we work on the core themes of gender equality and social inclusion, climate adaptation and mitigation, and strong institutions and effective governance. To find out more, go to [www.snv.org](http://www.snv.org).

## **Disclaimer**

This publication and the material herein are provided “as is”. All reasonable precautions have been taken by IRENA to verify the reliability of the material in this publication. However, neither IRENA nor any of its officials, agents, data or other third-party content providers provides a warranty of any kind, either expressed or implied, and they accept no responsibility or liability for any consequence of use of the publication or material herein.

The information contained herein does not necessarily represent the views of all Members of IRENA. The mention of specific companies or certain projects or products does not imply that they are endorsed or recommended by IRENA in preference to others of a similar nature that are not mentioned. The designations employed and the presentation of material herein do not imply the expression of any opinion on the part of IRENA concerning the legal status of any region, country, territory, city or area or of its authorities, or concerning the delimitation of frontiers or boundaries.

# TABLE OF CONTENTS

## TABLE DES MATIÈRES

## NOTES TO THE TABLES

Off-grid renewable energy statistics covers Asia, Africa, Central America & the Caribbean, Middle East, Oceania, and South America regions. China off-grid biogas statistics are included for Asia, but all other technologies are excluded for China and its special administrative regions.

The off-grid data is a combination of official and unofficial statistics obtained from various sources including national and international databases; industry association reports; and online sources such as websites, project reports, press releases, and news articles. Sections showing totals for biogas production, solar pump, and other off-grid solar PV are classified by end-use in separate tables. These separate tables are subsets and do not necessarily add up to their section totals. Individual entries in the tables are rounded independently and this can result in totals which are different from the sum of the constituent items shown.

The numbers represent estimates that are constantly revised to improve off-grid renewable energy statistics. Off-grid renewable power capacity data reflects the capacity installed and connected at the end of the calendar

year. The data is presented in megawatts (MW) rounded to three decimal places. Figures between zero and 0.5 kW are shown as a 0. The number of people served by off-grid renewable power under five hundred is depicted as 0. Blanks represent real zero values.

## NOTES À PROPOS DES TABLEAUX

Las estadísticas sobre energías renovables sin conexión a la red cubren las regiones de Asia, África, América Central y el Caribe, Oriente Medio, Oceanía y Sudamérica. Las estadísticas de biogás para Asia incluyen a China pero no a sus regiones administrativas especiales, mientras que las estadísticas para el resto de tecnologías excluyen tanto a China como a sus regiones administrativas especiales.

Les données hors réseau sont une combinaison de statistiques officielles et non officielles obtenues à partir de diverses sources, notamment des bases de données nationales et internationales; rapports d'associations industrielles; et des sources en ligne telles que des sites Web, des rapports de projet, des communiqués de presse et des articles de presse. Les sections présentant les totaux de la production de biogaz, des pompes solaires et des autres systèmes photovoltaïques hors réseau sont classées par utilisation finale dans des tableaux distincts. Ces tableaux distincts sont des sous-ensembles et ne correspondent pas nécessairement aux sommes totales de leur section. Les entrées individuelles dans les tableaux sont arrondies indépendamment, ce qui peut donner des sommes totales différentes de la somme des éléments constitutifs indiqués.

Les chiffres représentent des estimations qui sont constamment révisées pour améliorer les statistiques sur les énergies renouvelables hors réseau. Les données sur la capacité d'énergie renouvelable hors réseau reflètent la capacité installée et connectée à la fin de l'année civile. Les données sont présentées en mégawatts (MW) arrondis à trois décimales. Les chiffres compris entre zéro et 0,5 kW sont représentés par un 0. Le nombre de personnes desservies par une énergie renouvelable hors réseau de moins de cinq cents est représenté par un zéro. Les espaces vides représentent des valeurs réelles nulles.

## NOTAS A LAS TABLAS

Las estadísticas de energía renovable aislada cubren las regiones de Asia, África, América Central y el Caribe, Oriente Medio, Oceanía y América del Sur. Las estadísticas de biogás para Asia incluyen China, pero no sus regiones administrativas especiales, mientras que las estadísticas de todas las demás tecnologías excluyen tanto a China como a sus regiones administrativas especiales.

Los datos sobre energías no conectadas a la red son una combinación de estadísticas oficiales y no oficiales obtenidas de diversas fuentes, incluyendo bases de datos nacionales e internacionales, informes de asociaciones industriales y fuentes en línea como sitios web, informes de proyectos, comunicados de prensa y artículos de noticias. Las secciones que muestran los totales de producción de "biogás", "bombas solares" y "otros sistemas fotovoltaicos solares no conectados a la red", se clasifican por uso final en tablas separadas. Estas tablas separadas son subconjuntos y no suman necesariamente los totales de sus secciones. Las entradas individuales de las tablas se redondean de forma independiente, lo que puede dar lugar a totales diferentes de la suma de los elementos constituyentes mostrados.

Las cifras representan estimaciones que se revisan constantemente para mejorar las estadísticas sobre energías renovables fuera de la red. Los datos de capacidad de energía renovable sin conexión a la red reflejan la capacidad instalada y conectada al final del año natural. Los datos se presentan en megavatios (MW) redondeados a tres decimales. El número de personas atendidas por la energía renovable fuera de la red que sea inferior a quinientas se representa como 0. Los espacios en blanco representan valores reales de cero. Las cifras entre cero y 0,5 kW se muestran como un 0. Los espacios en blanco representan valores reales de cero.
